Our booms are capable of absorbing large volume whilst also providing containment of spills on land or water to reduce potential contamination of the environment. All booms are manufactured to the highest standards to give maximum performance..

At their extensive manufacturing facility in rural Cambridgeshire, Fentex have successfully commissioned a new manufacturing line to supply high quality absorbent booms to the UK industrial sector, Environment Agencies and export markets.

Marine booms

- 12cm or 20cm diameter, 3 metres long
- Robust outer net to allow ingress of contaminants
- Hydrophobic absorbent fill - will not absorb water
- Strong inner rope along the length of the boom for added strength during handling
- Hooks and rings at each end to allow overlapping and coupling together

Land booms

- 12cm diameter, 3 metres long
- Robust outer skin over oil absorbent fill

Standard Fill

- Flaked absorbent filling within inner sock and net
- For fuels and oils

SPAG (Spaghetti) Fill

- Absorbent strips in outer net (no inner sock)
- For viscous/heavy oils e.g. fuel oil
